Research Assistant, with Professor J. Alex Halderman 2013 - Present

- Computer security and Internet measurement research, concentrating on taking a global view of network ecosystems to gain security insights
- Created and maintain ZGrab, ZTLS, and ZMap, open-source tools for high-speed Internet-wide measurement (available on GitHub)
- Released <https://censys.io>, a search-engine for Internet-wide measurement data
- Developed a custom and automated big-data processing pipeline capable of handling >1TB data/day on current small-scale deployment used as the backend for Censys.

Whisper Project, with Professor Robert P. Dick 2011 - 2013

- Released MANES, an Android prototyping framework for mobile ad-hoc networks
- Released Shout, a user-facing censorship-resistant communication application built using MANES (available on Google Play Store)

Work Experience

Software Engineering Intern, Duo Security Summer 2013

- Two-factor authentication-as-a-service, using mobile phones as the second authentication factor and push notifications for login approval.
- Grew various Python backend subsystems to support new features; handled all bugs, feature requests, and security considerations for the Duo Unix client.
- Wrote a patch for OpenSSH to securely allow third-party authentication plugins.
