Hi!

I am responding to your advertisement for the Data Scientist position. ConsumerTrack is seeking a highly motivated individual who thrives in multidisciplinary teams and is passionate about data science research and I believe that my experience and skill set make me the ideal candidate for this position.

My name is Luchao Qi and I'm a master's student at Johns Hopkins University. My graduate training is to process data using Python/R and to analyze data using machine learning/deep learning. During these two years, I have developed various tools from websites to software packages for data analysis & machine learning. To strengthen my skills in deep learning, I have also constructed models in the field of computer vision & natural language speaking, which allows me to explore the data science area.

I am enthusiastic to apply these skills in a cutting-edge technological environment. I am particularly interested in the platform you provide to perform exploratory analysis of industrial data. In conclusion, I believe that my experience has made me a highly suitable candidate.

I look forward to hearing from you and do not hesitate to contact me if you have any questions.

Thanks in advance!

Luchao Qi
